## DXT-61A FEATURES

PRESS BUTTON TO SEND SIGNAL

RED INDICATOR WILL LIGHT DURING OPERATION

### FCC NOTE:

This device complies with FCC Part 15. Operation is subject to the following two conditions: (1) This device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

**PRESS BUTTON FOR A MINIMUM OF 2 SECONDS**

## PRODUCT DESCRIPTION

The DXT-61A is a battery powered, portable, miniature pendant transmitter designed for use with Linear's DX Format receivers. The transmitter can be used in a limitless number of wireless remote control applications. Pressing the button on the transmitter sends a digitally coded wireless signal to its companion receiver.

The digital DX code format features over a million possible codes. Each DX transmitter is precoded at the factory to a unique code, so no field coding is required. The transmitter can send a signal for up to 10 seconds with each button activation.

For versatility, the transmitter code can be programmed into any receiver channel. Receivers must be programmed to the transmitter code before system testing and operation. DX Format digital receivers are programmed by "Learning" the preset factory code from the transmitter. Refer to the receiver's instructions for details on programming.

The DXT-61A transmitter is powered from a 12-Volt Type GP-23 battery with an expected battery life of about 1 year. The red test/operate indicator lights during operation. When the transmitter does not function, or its range decreases, replace the battery.

The transmitter button has a positive "click" feel. The transmitter is supplied with an adjustable lanyard with a breakaway release.

### DXT-61A OPERATION

The DXT-61A is a one-button, one-code transmitter. Pressing the button sends the transmitter's code to the receiver. Press the button for a minimum of two seconds to insure receiver activation.

## BATTERY REPLACEMENT

TWIST LANYARD LOOPS TO REMOVE BATTERY COVER.

**IMPORTANT!**  
WHEN CHANGING THE BATTERY, INSERT THE NEGATIVE (-) END FIRST

PUSH POSITIVE (+) END INTO TRANSMITTER LAST

## LINEAR LIMITED WARRANTY

This Linear product is warranted against defects in material and workmanship for twelve (12) months. **This warranty extends only to wholesale customers** who buy direct from Linear or through Linear's normal distribution channels. Linear does not warrant this product to consumers. Consumers should inquire from their selling dealer as to the nature of the dealer's warranty, if any. **There are no obligations or liabilities on the part of Linear LLC for consequential damages arising out of or in connection with use or performance of this product or other indirect damages with respect to loss of property, revenue, or profit, or cost of removal, installation, or reinstallation.** All implied warranties, including implied warranties for merchantability and implied warranties for fitness, are valid only until the warranty expires. **This Linear LLC Warranty is in lieu of all other warranties express or implied.** All products returned for warranty service require a Return Product Authorization Number (RPA#). Contact Linear Technical Services at 1-800-421-1587 for an RPA# and other important details.

### IMPORTANT !!!

Linear radio controls provide a reliable communications link and fill an important need in portable wireless signaling. However, there are some limitations which must be observed.

- \* For U.S. installations only: The radios are required to comply with FCC Rules and Regulations as Part 15 devices. As such, they have limited transmitter power and therefore limited range.
- \* A receiver cannot respond to more than one transmitted signal at a time and may be blocked by radio signals that occur on or near their operating frequencies, regardless of code settings.
- \* Changes or modifications to the device may void FCC compliance.
- \* Infrequently used radio links should be tested regularly to protect against undetected interference or fault.
- \* A general knowledge of radio and its vagaries should be gained prior to acting as a wholesale distributor or dealer, and these facts should be communicated to the ultimate users.
